ACQUIRE
INTELLIGENT FOOD PROCUREMENT

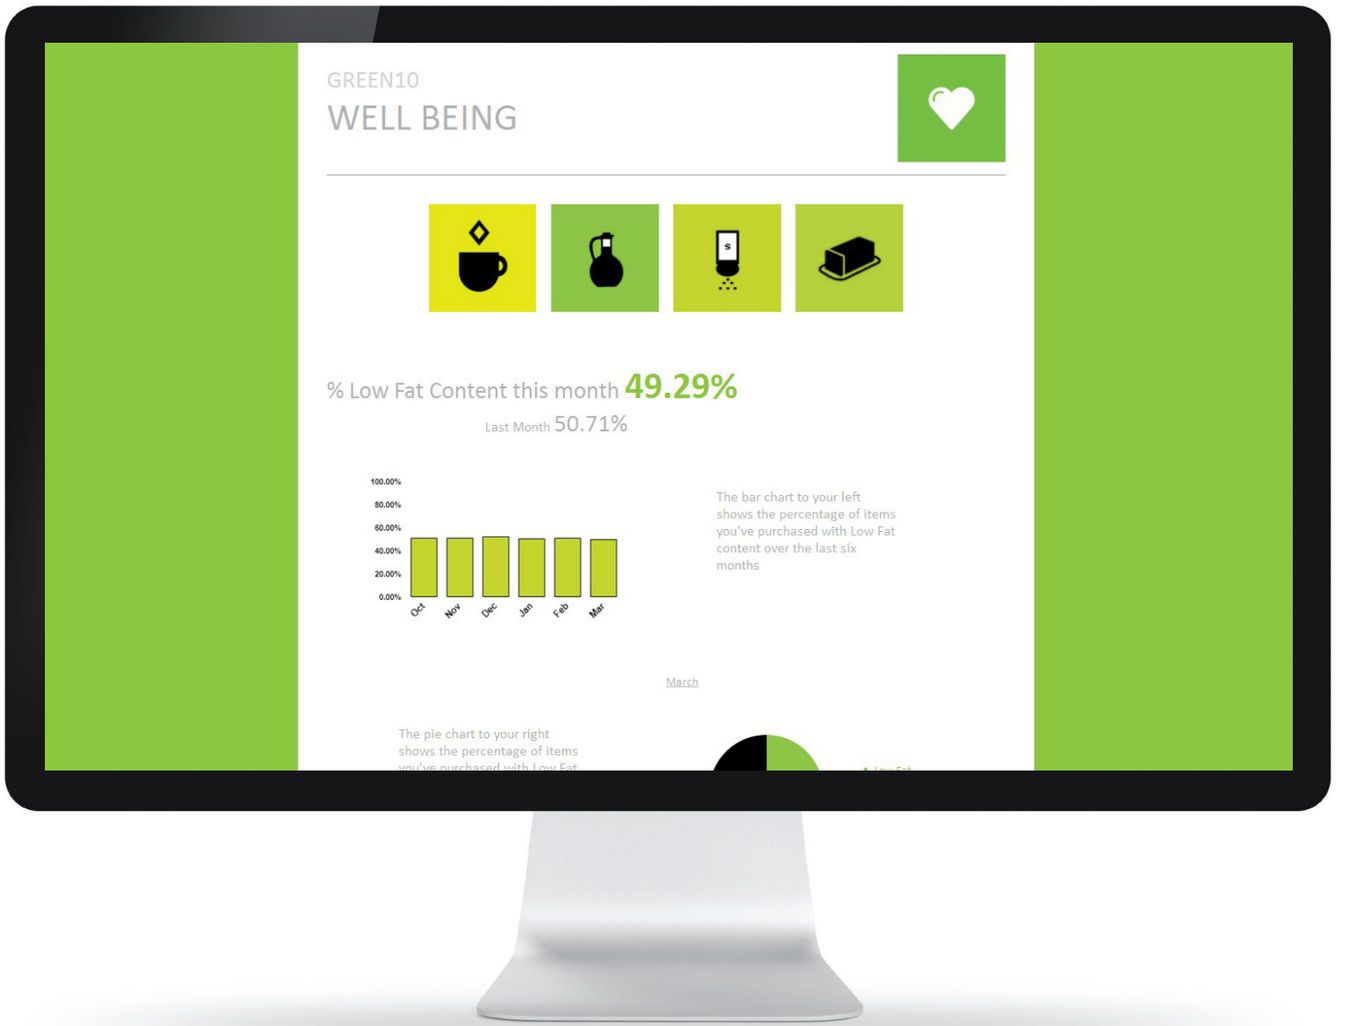

GREEN10

Sustainability, social responsibility and environmental awareness have been high on the foodservice agenda for some time now, yet many caterers still struggle to come up with a plan that shows the positive effects their efforts are having.

Green10 provides industry metrics for 10 specific ‘pillars’, each relating to responsible sourcing, purchasing and sustainability: Food Mileage, Local Sourcing, Environmental Profile, Seasonality, Renewable, Culture, Animal Welfare, Wellbeing, Packaging and Food Waste.

Every Green10 pillar provides metrics you can monitor and measure against specific targets, and use to show your customers and clients exactly what you're doing in terms of responsible sourcing.

With competitive fees and no capital investment required, and no restriction on your business size, location or technical capability, Green10 is completely inclusive.

To discuss your requirements call: **0800 316 4441**
